Please substitute this updated language under 'Brief Description' for Pavillion:

EPA released the draft report "Investigation of Groundwater Contamination near Pavillion, Wyoming" Dec 8, 2011, which preliminarily concluded that the drinking water aquifer at Pavillion is contaminated with chemicals best explained as resulting from hydraulic fracturing. Additional samples were collected by EPA from both monitoring wells during Apr 16-27, 2012 with USGS jointly sampling MW01. Sample results are currently undergoing Quality Assurance review, with results expected late summer 2012 and a research brief communicating results is expected in mid-September. Peer review panel scheduled to be contracted and to begin work by August, with the panel scheduled to meet in Wyoming in Nov-Dec 2012.

thanks!

Subject: Fw: CoS Policy Update 17 Jul

All,

Please make any updates/changes and forward to me by noon tomorrow.

Attached is last weeks Policy Update. Please use this one and update it - when removing an item, please "strike" through it, so I do not inadvertently keep it on a different spreadsheet from another ARA.
